

More options for flow cytometry

Sysmex is now the exclusive distributor of Sony Biotechnology flow cytometry products in Australia and New Zealand.

Sony Biotechnology brings advanced technology to the flow cytometry arena. From highly-automated, micro fluidic chip-based cell sorters to class-leading spectral analysers, Sony has your research needs covered.

To learn more about the ID7000 spectral analyser - supporting up to 7 lasers and 186 detectors - or the MA900 Multi Application Cell Sorter with 12 fluorescent parameters and 4-way sorting, visit the Sysmex website or contact your local Sysmex representative.
